Dongguan Zhuowei Intelligent Technology Co.

2024 · Automatic Oil Filling Machine

Profile

Established in 2019, Dongguan Zhuowei Intelligent Technology Co., Ltd., located in Dongguan, Guangdong Province, China, specializes in the research, production, and sales of automated equipment for small precision liquid filling machines. With extensive expertise in automatic oil–filling machines within the electronic atomizer (CBD) industry, we are committed to providing high–quality and high–precision automated solutions to customers.

Core Businesses

- Precision Liquid Filling Machines Focus on the development and manufacturing of small precision liquid filling machines.
- Automatic Oil–Filling Machines for Electronic Atomizers Provide high-precision oil-filling machines for the CBD and THC industries.
- Customized Automation Equipment Tailored solutions meet the specific needs of customers.

Technological Advantages

R&D Strength

Drive technological innovation with our professional R&D team.

Innovative Design

Enhance the stability and reliability of the equipment by utilizing advanced control systems and technologies.

Quality Assurance

Ensure high performance and durability of the products by implementing strict quality control processes.

Development Vision

Strive to become a global leader in electronic atomizer automation equipment supply.

Expand international market share and enhance brand influence.

Drive technological innovation to meet diverse customer needs.

11 ZW-FG01 Handheld Oil Filling Gun

Overview

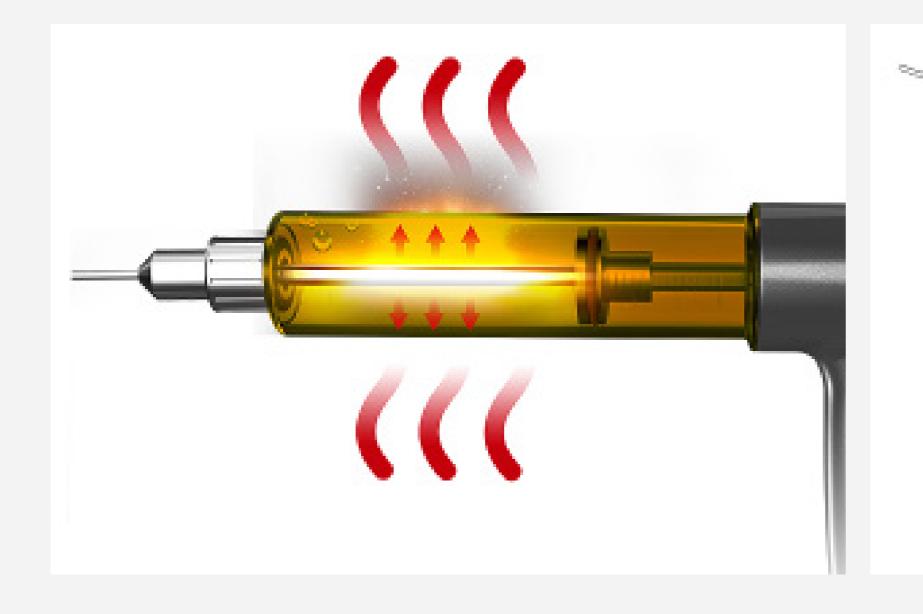

Coosifiention

The handheld oil filling is a simple and lightweight tool designed specifically for customers with small-scale oil filling needs. This compact machine consists of two parts: a temperature control box and a heated injector. The control box is compatible with 110V-240V power sources. Heating activation, temperature settings, and other operations are all managed through the control box. The injector features a transparent chamber, allowing users to easily monitor the remaining oil. Additionally, the piston rod is equipped with a knob-style flow regulator for precise adjustment of the filling volume.

Specifications					
Model	ZW-FG01	Power Supply (Optional)	AC100V-240V	Temperature Control Component	Oil Chamber
Customization	Nonsupport	Applicable Use	CBD/THC/Nicotine Oil/Other Liquids	Filling Accuracy	0.02
Filling Heads	1	After-Sale Service	3-year Warranty	Applicable Bottle Height	Universal
Heating Range	Room Temperature - 120°C	Level of Automation	Manual	Power	200W
Filling Volume	0.5/1.0/1.5/2.0ml	Oil Capacity	25ml/50ml	Applicable Industry	CBD/THC/Vape/Cosmetics
Applicable Bottle Diameter	Above 2 mm	Production Capacity	7-14 pcs/min	Packaging	Carton Packaging
Packaged Dimensions/ Weight			460*300*130mm/ about2.5 kg	Whether Cross-Border Export Exclusive Supply Source	Yes

- Lightweight and portable, with a total packed weight of only 2.5 kg, making it ideal for oil filling operations in non-stationary locations.
- The transparent container allows for easy monitoring of the liquid status and remaining volume.
- With minimal switches and buttons, it is easy to operate without any difficulty.
- Affordable and cost-effective, it is suitable for customers with short-term oil filling needs.

1. ZW-100R

High-Precision Oil Filling Machine

Upgraded 510 Cartridge Disposable Vape CBD/THC High-Precision Semi-Automatic Oil Filling Machine ZW-100R.

Overview

Specifications

The ZW-100R is one of the most widely used oil filling machines in the cannabis industry. Since 2019, it has served thousands of customers, earning high market recognition and visibility. This model remains a staple in the cannabis filling industry due to its compact size, ease of operation, and high stability. Through years of optimization and upgrades, the temperature control and precise dosing systems have been fully integrated into the PLC, allowing quick and accurate setting of parameters such as temperature, filling volume, and filling speed via the touch screen.

Specification							
Model	ZW-100R	Working Principle	Injection Pump	After-Sale Service	1-Year Warranty	Applicable Bottle Height	¦ Universal
Customization	Support	Control Method	Touch Screen + PLC + Custom Program	Level of Automation	Semi-Automatic	Filling Principle	Negative Pressure

- Precise Quantification: The filling volume is controlled by a motor and a screw rod, achieving an accuracy of up to 99%.
- Accurate Temperature Control : The sensitive temperature sensor ensures a deviation within ±3°C. The temperature can be set freely between room temperature and 120°C.
- Medical-Grade Materials: All parts that come into contact with oil are made of 316/304 stainless steel, and the sealing parts use special fluororubber material.
- Simple Operation: Parameter settings are straightforward, and maintenance is easy.

These advantages make the ZW-100R highly popular among CBD, THC, and nicotine oil customers in the United States, Canada, and beyond, offering an excellent solution for both heated and non-heated liquid filling needs worldwide.

	High Precision	±1% filling accuracy, meeting the needs of precise liquid filling.
	Heating Function	ZW-100R features a heating function with a range from ambient temperature to 120°C, helping to reduce liquid viscosity for easier

11 ZW–JY03 High-Precision Oil Filling Machine

Overview

Specifications

The ZW-JY03 is a high-precision oil filling machine with manual oil collection. Compared to the 100R model, it offers the following

1. With a heating power of up to 700W, it significantly reduces the heating time.

2. The 1.2L capacity oil tank minimizes the frequency of refills, saving labor.

3. Without a handle, it leaves less residue.

Specification				
Model	ZW-JY03	Working Principle	Injection Pump	After-Sale Service

- Fixed oil filling for more convenient operation, and equipped with a larger capacity oil barrel.
- With a high heating power of up to 700W, the heating efficiency is excellent. Through indirect heating with aluminum components, the heating is uniform. Two temperature sensors detect the temperature of the oil barrel and oil path separately, enabling precise temperature control.
- The modular structure makes inspection and maintenance easier. The high-definition 7-inch large screen, arranged at an angle, improves usability and enhances the human-machine interaction experience.
- Medical-Grade Materials: All parts that come into contact with oil are made of 316/304 stainless steel, and the sealing parts use special fluororubber material.

Applicable Products:CBD/THC, 510 series, ceramic cartridges, cotton wick cartridges, integrated cotton devices, integrated vape pens, Luer lock syringes, G5, CCELL, vape pens, 0.5ML/0.8ML/1.0ML, Delta 8, Delta 9.

Applicable Liquids: All viscosity e-liquids, CBD/THC oils, nicotine e-liquids, oil for Luer lock syringes, high-value essential oils, hand sanitizers, and other liquids requiring high precision and viscosity control.

Target Customers: ZW-100R is one of the most popular products among CBD/THC/nicotine e-liquid customers in the U.S. and Canada. It is also widely favored by customers worldwide for both heated and non-heated liquid injection applications.

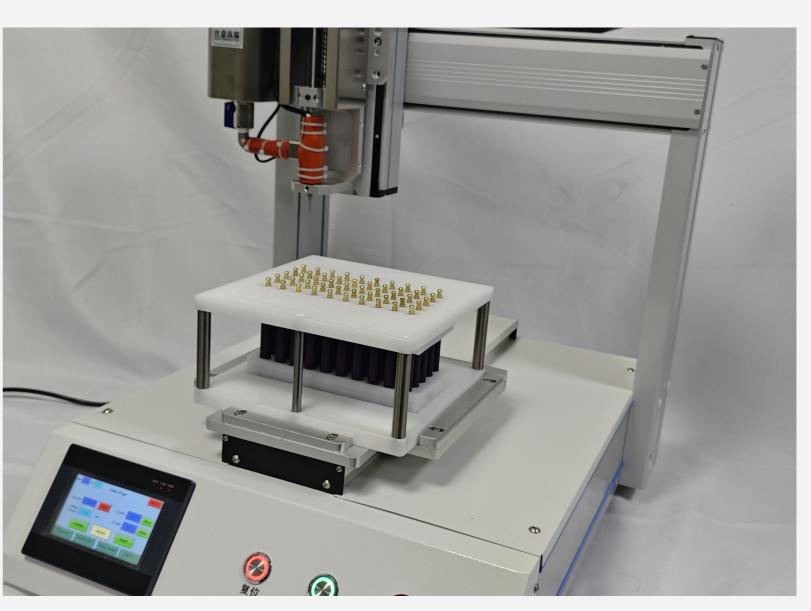

1 ZW - 221Automatic Oil Filling Machine (Single Filling Head)

Overview

ZW-221 is an automatic oil filling machine that boasts higher efficiency and cost savings in labor compared to ZW-100R. This model utilizes a three-axis platform controlled precisely through a touchscreen, PLC, and self-authored program to achieve automated oil filling. Unlike common automated machinery that typically requires a certain technical threshold for operation, this model has undergone significant optimization in human-machine interaction. The user interface is simple and easy to understand, allowing novices to operate it directly after simple training. This model, the first of its kind designed by our factory in the cannabis industry, draws on years of technical accumulation, refinement, and optimization. These efforts have rendered this machine impeccable in both stability and efficiency, making it the top-selling automated oil filling equipment in the cannabis industry.

Specifications

11 ZW-221F Automatic Oil Filling Machine (Single Filling Head)

Overview

The ZW-221F is a derivative model based on the ZW-221, with similar functions and usage. To meet the demands of large-scale production, the oil tank capacity has been improved to 3000ml. This model is equipped with a variable-speed stirring motor that stirs the liquid while it is heated, ensuring the oil is evenly and thoroughly heated inside the tank.

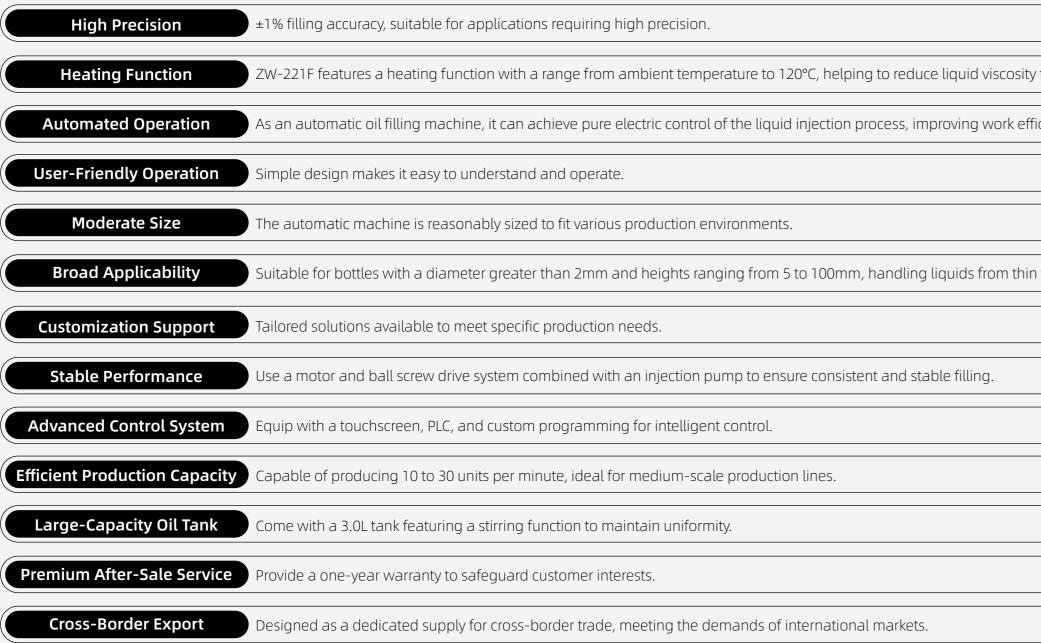

Specifications							
Model	ZW-221F	Control Method	Touch Screen + PLC + Custom Program	Level of Automation	Automatic	Drive Method	Motor + Ball Screw

11 ZW-450 Automatic Oil Filling Machine

Overview

The ZW-450 is a fully automated machine that integrates automatic sorting, feeding, oil filling, and capping/ pressing. It is primarily used for large-scale production of products such as CCEL and G5, significantly reducing labor and lowering costs for manufacturers. The machine completes capping/pressing approximately 3 seconds after oil filling, addressing the issue of oil leakage caused by leaving atomizers uncapped for extended periods. It features a rotary assembly line design, greatly reducing the machine's size and making it easy to transport.

Specifications							
Model	ZW-450	Control Method	Touch Screen + PLC + Custom Programming	Level of Automation	Automatic	Drive Method	Motor + Ball Screw
Customization	Support	Power Supply (Optional)	AC100V-120V; AC200V-240V	Oil Capacity	, 1L	Power	2500W

Filling Volume	0.2-3ml/0.2-5ml	Screen Size	7 inches	Filling Accuracy	0.01	Packaging	Export Wooden Case
Applicable Bottle Diameter	Above 2 mm	Dimensions / Net Weight	800*800*1400mm/about 305kg	Applicable Bottle Height	5-100mm	Dimensions with Wooden Case / Weight	920*1300*1600mm/about 350kg
Working Principle	Injection Pump	After-Sale Service	1-Year Warranty	Filling Principle	Negative Pressure	Whether Cross-Border Export Exclusive Supply Source	' 'Yes

- Each workstation is modularized for easy and quick inspection and replacement, facilitating ease of maintenance.
- Sorting, oil injection, and capping are integrated into one system for fully automated operation. The minimal interval time improves efficiency and prevents oil leakage.
- Specially developed operating system tailored for the workflow, more user-friendly, simple and easy to learn.
- Electric injection pump, high oil filling accuracy, high stability, and easy to clean.

Multifunctional Integration	Integrate automatic liquid filling, capping, and sealing functions, enhancing production line efficiency.
High-Efficiency Production	Capable of producing 15 to 30 units per minute, ideal for medium-scale production.
High-Precision Filling	±1% accuracy ensures consistent filling volumes for every unit.
Heating Function	Include a heating feature, suitable for maintaining fluidity or improving the filling process for certain liquids.
User-Friendly Operation	Feature a touchscreen with PLC and custom programming for simple and intuitive control.
Stable Performance	Utilize a motor and ball screw drive system for reliable and smooth operation.
Broad Applicability	Compatible with bottles over 2mm in diameter and heights between 5 and 100mm, accommodating a variety of conta
Flexible Customization Services	Offer tailored solutions to meet specific customer needs.

11 ZW-YMSD Manual capping machine

Overview

The ZW-YMSD is a manual capping machine designed to further reduce the cost of small-batch production. In response to customer demand, we introduced this affordable manual model, featuring a simple structure and easy portability. The tested pressure can reach up to 2 tons, and the gap between the upper and lower pressing plates can be manually adjusted, making it compatible with various atomization devices of different heights.

- Purely manual, with no electrical components, and no limitations on usage scenarios.
- Excellent lever design allows for easy application of up to 2 tons of pressing force.
- The fully mechanical structure ensures stability and durability, with minimal after-sales issues.
- Affordable, making it ideal for prototyping and small-batch production needs.

1. ZW–YM10T Automatic Capping Machine

Overview

In response to the requests of our customers of addressing the issues of high noise and inconvenient control of the pneumatic capping machine, we launched the first generation electric capping machine in 2020. After three rounds of upgrades and optimizations, this model has gained widespread recognition from customers due to its outstanding performance. It is currently the best-selling capping machine on the market, widely used in industries such as e-cigarettes, CBD/THC, and cosmetics. The machine is available in two configurations: stepper motor and servo motor, providing customers with more choices to meet their different needs.

设备会数

Product Functions and Features

• The pressing force can reach up to 10 tons, making it suitable for capping all CBD/THC devices on the market.

- The pressing stroke can be precisely adjusted via the screen, ensuring the cap is pressed into the correct position without damaging the product.
- Fully electric with no air pump, allowing for precise control of the pressing speed with minimal noise.
- The fully enclosed body, equipped with access control, ensures safety and reliability.

The ZW-230ZD is a derivative model based on the ZW-210ZD, with similar functions and usage. To meet the demands of large-scale production, its structure has been enhanced, allowing it to fill 300 pre-rolls in a single batch. The filling, compacting, and sealing processes are manually controlled. It offers simple operation, a small footprint, and excellent stability.

Manual Control	Enable manual filling, capping, and sealing, suitable for production processes that require hands-on involvement.)(Customization Services
Easy Operation	Simple design makes it easy to operate, reducing the learning curve and operator training time	.)(Industry Applications
Stable Performance	Maintain reliable performance even under manual filling conditions.)(Portability
Flexibility	Ideal for frequent parameter adjustments or small-batch production.)(Premium After-Sale Servio
Cost-Effective	As a semi-automatic machine, the ZW-230ZD offers a lower cost compared to fully automated equipment, suitable for budget-conscious businesses.)(Cross-Border Export

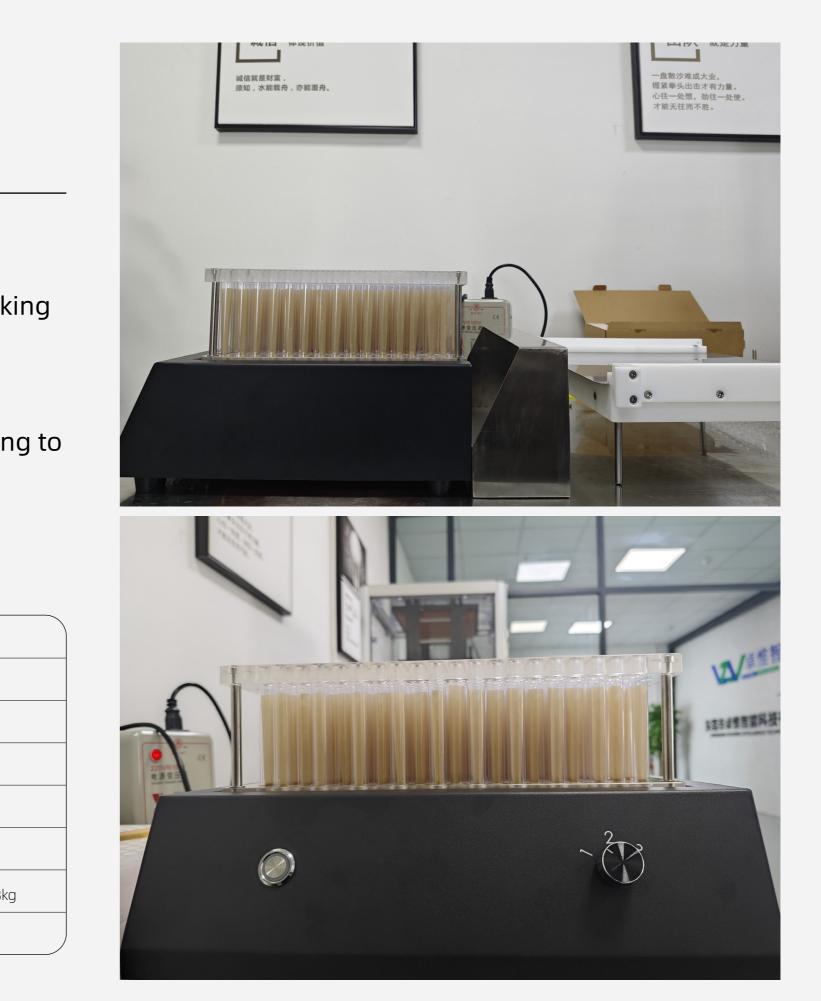

S	Provide tailored solutions to meet specific customer needs.)
	Particularly well-suited for precision filling like cannabis flower roll production.)
	Compact dimensions (365×415×135mm) and relatively lightweight (about 38kg), allowing for easy movement and setup.)
vice	Provide a one-year warranty to ensure a positive customer experience.)
	Designed as a dedicated supply for cross-border trade, meeting the demands of international markets.)

- Manual filling ensures stable product quality.
- A higher number of pre-rolls can be filled in one batch, increasing efficiency and making it suitable for medium-scale production.
- Adopts a brushless motor, ensuring a longer lifespan.
- Utilize a clever structure for integral molding, and eliminate the need for hand-twisting to seal, resulting in higher efficiency and more compact formed products.

Model	ZW-230ZD	Level of Automation	Semi-Automatic
Single Batch Output	300pcs	Production Capacity	15-20pcs/min
Filling Accuracy	Manual Filling	Drive Method	Electric
Control Method	Electrical Control	Power	75W
Power Supply (Optional)	AC100V-120V; AC200V-240V	Applicable Industry	Cannabis Flower Pre-Rolls
Customization	Support	Packaging	Export Wooden Case
Dimensions / Net Weight	38kg365*415*135mm/about 38kg	Dimensions with Wooden Case / Weight	420*500*660mm/about 48kg
After-Sale Service	1-Year Warranty	Whether Cross-Border Export Exclusive Supply Source	Yes

Specifications

BACK-HF550 Automatic Flower Filling Machine

Overview

The ZW-HF550 is a fully automatic cannabis flower filling machine that integrates automatic feeding, weighing, filling, sealing, trimming excess material, and discharging into one system. This model offers non-standard customization, with functions, operation interface, and dimensions tailored to meet customer requirements. Since its launch in 2020, the machine has undergone three upgrades. With years of experience and continuous refinement based on user feedback, the latest generation has reached industry-leading standards in terms of structure, functionality, programming, and stability.

Multifunctional Integration	Combine filling, capping, and sealing functions, reducing time and cost associated with process transitions.	Flexib
High-Precision Filling	±2.5% filling accuracy ensures consistency and product quality.	Adva
Efficient Production Capacity	Produce 20 to 25 units per minute, suitable for medium-scale production.	Larg
User-Friendly Operation	Control via a touchscreen with PLC and custom programming for intuitive and easy operation.	Rel
Stable Performance	Utilize electric drive systems to ensure smooth and reliable operation.	Cro

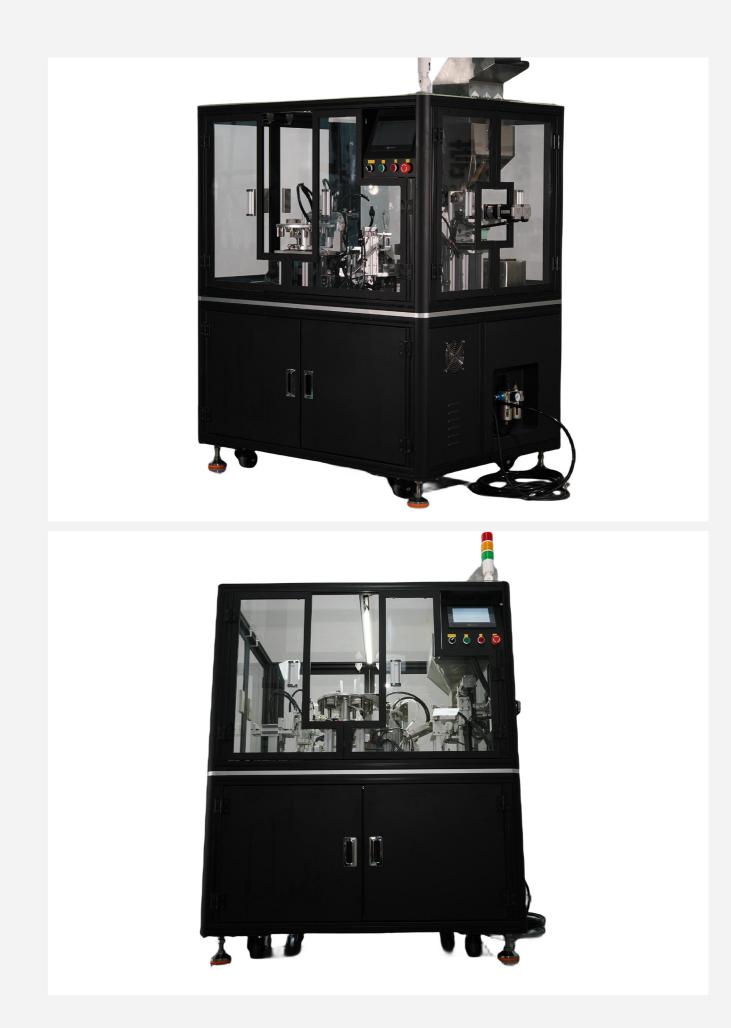

kible Customization Services	Offer tailored solutions to meet specific customer needs.
wanced Working Principles	Employ innovative filling methods to ensure accuracy and efficiency.
rge-Capacity Storage Tank	Equip with a 5L tank, with customization options to meet different production scales.
eliable After-Sale Service	Provide a one-year warranty to ensure a positive customer experience.
ross-Border Export Ready	Designed for cross-border trade, meeting the demands of international markets.

- Adopts a fully automated mechanical structure, requiring only raw materials and finished product collection, suitable for large-scale factory production.
- Fully automated process with high production efficiency; products meet weight standards, have consistent appearance, and meet aesthetics and well-arranged.
- Modularize each component, and facilitate quick testing, inspection, and maintenance.
- The operation system is simple and clear, easy to use. The machine startup interface and machine control interface support different security levels, reducing operational risks for employees.

Specifications			
Model	ZW-HF550	Level of Automation	, Automatic
Customization	Support	Flower Bud Barrel Capacity	5L
Filling Accuracy	Dual Heads	Production Capacity	15-20pcs/min
Filling Volume	0.5-2g	Filling Accuracy	±5%
Applicable Cone Shapes	Tapered	Applicable Cone Length	84-109mm
Control Method	Touch Screen + PLC + Custom Program	Drive Method	Motor + Cylinder
Power Supply (Optional)	AC100V-120V; AC200V-240V	Power	1200W
Screen Size	7 inches	Packaging	Export Wooden Case
Dimensions	1100*1050*1450mm	Dimensions with Wooden Case / Weight	280k
After-Sale Service	1-Year Warranty	Whether Cross-Border Export Exclusive Supply Source	Yes
